Art Unit: 2154

1. Claims 10-14,28-32 and 37-44 are presented for examination.

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 10-14, 28-32 and 37-44 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification fails to disclose the channel tracking information includes the subscriber and usage information is generated at least partially while off-line by at least one client in any manner.

4. Applicant's arguments filed 01/27/2007 have been fully considered but they are not persuasive.

5. Applicant argument appears to addressing enablement. Either of the cited passages discuss or mention the channel tracking information includes the subscriber and usage information is generated at least partially while off-line by at least one client. Applicant has failed to show that the invention as claimed was in the possession of the inventors at the time of filing.
